

Date: June 6, 2016

Dear Omron Adept Customer,

We are writing to give you an important announcement about the status of our Python Linear Module and SmartServo Kit product lines. We regret to inform you that these product lines will be discontinued effective immediately. All orders that have already been received will be fulfilled.

We are facing two critical issues in our ability to supply both the Python Modules and the SmartServo Kits:

1. Critical components in each product are no longer available from suppliers
2. Both products do not meet the new EU directive 2011/65/EU (Restrictions of Hazardous Substances) which is effective in 2017

We have been exercising our supply chain to extend the product availability but have only been able to source a limited number of parts. These parts will primarily be used to support our existing installed base for a period of five (5) years and as a result we will stop immediately all non-critical system sales of Python Linear Modules and SmartServo Kits.

We have explored the idea of a new product development to replace these products but current business conditions and timing do not create a viable product strategy for Omron Adept or its' customers.

We understand that this notification may cause disruptions to your business and we apologize for this inconvenience. Please see the following notification details to determine how we can best meet your immediate needs. Adept Customer Service will assist you in determining whether your systems are impacted by this announcement, and we encourage you to plan accordingly. Please contact us for assistance in planning for your long-term support needs. Adept Customer Service and Service Sales can be reached at support@adept.com and parts@adept.com, respectively. In North America, you may also call our service hotline at 925-245-8182 or 800-232-3378.

Sincerely,

A handwritten signature in black ink, appearing to read "Yan Banducci".

Product End of Life Notification

Description: Omron Adept Technologies is announcing the End-of-Life (EOL) for Python Linear Modules and all SmartServo kits.

When: All orders that have been received will be fulfilled. The end-of-life for new standard orders is effective immediately.

- June 8, 2016

End-of-Life Part Numbers:

- Omron Adept Python Linear Modules, model numbers L08*, L12*, L18*
- Omron Adept Python Combining Kits, model numbers M*
- Omron Adept SmartServo Kits
- Omron Adept MotionBlox MB-10, MB-40L, MB-60L

Note: See appendix A for complete list of sales bundle part numbers that contain the Python Linear Modules and SmartServo kits.

What to do: We understand that this is an unexpected announcement and may cause disruptions to your business. Unfortunately, there are no easy solutions for these critical material shortages. For **critical** system requirements we propose the following:

- Place final order with Omron Adept by July 8, 2016
- Omron Adept will work with suppliers to try and procure and custom build the systems
 - Please note that these systems may contain custom built and/or factory refurbished components. All systems will come with standard warranty
- All orders will have 30 week lead time
- All orders must be delivered by June 1, 2017
- All orders will contain a 25% price premium to cover increased costs due to custom components

Replacement Products:

There are no direct replacement products for Python Linear Modules and SmartServo Kits.

Some systems may be re-created on Omron's Sysmac automation platform, consisting of an NJ Machine Controller, Omron Linear Modules and Omron G5 Servo motors. These systems are programmed and controlled on the Sysmac automation platform, and are independent of Adept's eV+ based controls. Please see https://www.ia.omron.com/products/category/motion_drives/servomotors_servo-drivers/ or contact your local Omron representative for more details.
